comfortnoise features for the first time a video jockey that illustrates one of our podcasts: **vj inxile** (vj union australia; melbourne/australia) is into the visual business since years and looks back on a long row of varied artistic events and collaborations. having her roots in switzerland, she currently lives and works in melbourne where she decisively pursuits the formation of the australien vj scene. during her stay in europe this spring/summer, she vjs at several events and attends a worldwide vj conference in rome. simply gorgeous that she joins us at livebeats' studio in order to live-perform her art while **new.com** (comfortnoise, dubexmachina; zürich/switzerland) is playing a dj set in 029-0512! it's going to be a uniquely visualized travel into bottom rock techno, bass music and deep house.
