

comfortnoise podcast 031-0712

- wonky, abstract, beats, drums & basses over 2h/31m/54s
- by **dj shoudelistix** (sg) & **new.com** (comfortnoise, dubexmachina; zh)
- streamed on july 20th 2012 over www.livebeats.com
- download from www.comfortnoise.com (mp3/224kbs/250mb)

dj shoudelistix (st. gallen/switzerland) went through drum'n'bass, hiphop and digital mixing until he (re-)discovered his passion for abstract, instrumental hiphop and vinyl. of course, we always gladly promote vinyl - but in fact never had particularly this sound in our show. therefore we are as happy as greedy to welcome dj shoudelistix. he comes with a heavy heavy bag full of acoustic pearls, profound scratching skills and naturally a well formed sense for correct basses. whatever kind of story he will tell us, we're ready!
